

Initialize API

This examples shows how to create a new instance of the Voxel Farm client Python API.

```
# Import the Voxel Farm Client Library

from voxelfarm import voxelfarmclient

# The URL for the Voxel Space API
vf_api_url = 'https://vf-api.voxelspace.com'

# Create instance of the Voxel Farm REST API

vf = voxelfarmclient.rest(vf_api_url)
```
